# 5000 – the superlative JOOLA table!

The JOOLA 5000 starts a new chapter in the 50-year-old story of success of JOOLA table tennis table production. For the first time in history, the legendary JOOLA table top is available with a thickness of 25 mm. This guarantees a 100% even bounce of the ball on any part of the playing area – no sliding, naturally a quick and high ball bounce as on all JOOLA competition tables.

In addition the JOOLA 5000 impresses with a new, convenient and ultra-modern undercarriage.

Even national coach Jörg Roßkopf was overwhelmed by the clean bounce of the ball when testing the JOOLA 5000 for the first time: "I played my first strokes at the age of 8 on a JOOLA table and I have won almost all major titles on JOOLA tables, but this new table with the 25 mm top exceeds anything. The ball bounces cleanly but is still quick. Sliding of the ball is almost impossible on this table. In my opinion this is the perfect table tennis table, unique worldwide!"

## 5000

- original JOOLA competition table top, 25 mm
- extremely fast playing surface due to special processed polyester coating
- metal frame 60 mm
- automatic system
- stable, powder-coated metal undercarriage
- height adjuster
- stable construction with automatic legs
- large 150 mm wheels for easy transport
- double anti-tilting device
- corresponds with Norm EN 14468-1 A high performance sports

## SHOWCOURT 2014

- original JOOLA competition table top, 22 mm
- playing surface with specially processed polyester coating
- extreme even ball bounce
- stable metal undercarriage encased in a sturdy plastic surround
- height adjuster for alignment on uneven floors
- corresponds with European Standards EN 14468-1 A top performance sport

Art. 11450

The undercarriage encasing can be individually designed.  
Price on request.

## THE HISTORY OF THE SHOWCOURT TABLE TENNIS TABLE

During the 1996 Olympic Games in Atlanta, ITTF President Adham Sharara and JOOLA Managing Director Michael Bachtler had a conversation, among other things about the remark of the TV people that for table tennis broadcasts the undercarriage constructions of the tables were not very "TV-like".

This was the reason that at the next games in 2000 in Sydney, JOOLA used a „SHOWCOURT“ for the first time (a special version of a final game table). At that time only in form of a cover made from elastic cloth (designed by the designer, Jens Denecke), however still so revolutionary that the table tennis hall was praised by the IOC as being one of the best designed sports venues.

This version was then used at all subsequent top events.

The next step followed in 2004 in Athens, where for the first time there was a table with a very special designed construction, based upon the layout of the two designers, Ursula Redfuss and Karen Donndorf. An additional effect was provided by the illumination fixed under the table top.

In the meantime many more versions have been presented – ITTF Worldcup, Asian Games, European Championships, Asian Championships, Commonwealth Games, countless national and international championships as well as World Tour tournaments – all these top events were played on JOOLA Showcourts.

# Jörg Rosskopf

*He is the outstanding personality in the history of German table tennis, a flagship and a symbol of our sport way beyond the borders of Germany. His impressive achievements and his natural, objective and modest attitude have made him into an absolute popular figure.*

*There is hardly a thing that has not already been written about Jörg Roskopf. The 44-year-old men's doubles World Champion together with „Speedy“ Fetzner in Dortmund in 1989, is a table tennis icon, a charismatic appearance in the German table tennis sport and also, still today - as a successful national coach - the most well known German table tennis star of all time. What had not already been written about „Rossi“ in newspapers and magazines, is in the 2012 authorised biography by Germany's Mr. Table Tennis, published by Ulf Krämer (Rossi: Jörg Roskopf - The Biography).*

*Unforgotten is „Rossi's“ farewell match as a Bundesliga professional on the 9th of April 2010 in Hanau, where more than 2000 people stood on their chairs in the sold-out hall with enthusiasm, as he won the last point against Fulda-Mabertzell's Robert Svensson - simply a goose-pimple atmosphere with and thanks to Rossi.*

*Jörg Roskopf is a pronounced family man and takes his wife Sabine, their daughters Leonie and Jule, as well as son Linus, to the table tennis events as much as possible. Even though he feels at home in the table tennis world travelling all over the globe, he is very modest and remains attached to his home. Since retiring from his playing career, he is registered at his home club, DJK BW Münster, in the Oberliga.*

*„Rossi's“ career as a player was full of highlights: „There were of course many great successes, but you rarely forget the big titles, like the European Championship title in singles in Stuttgart 1992 or the World Championship title in doubles in 1989, which was definitely the biggest highlight in my career.“ In 24 years of Bundesliga he won 480 singles matches. The two-time win of the Champions League title with TTV Gönner in 2005 and 2006 was also remarkable.*

*In 2010 he ended his career as an active player. However, from 2008 onwards, the qualified A-License-Coach was the assistant of his predecessor, Richard Prause. On the 1st of August 2010, he then became the successor of Prause as the German men's National Coach. The German National Team won the European Championship gold medal in singles, doubles and team directly under his leadership. In 2011 the titles were successfully defended in the singles and team*

*event. In 2012, the German team became Vice World Champions in Dortmund. At the Olympic Games in the same year, Rossi's protégés won the bronze medal in the team event. On top of this, Ovtcharov secured third place in the singles. At the World Championships in 2014 in Tokyo, „Mr. Table Tennis“ lead his players unthreatened into the final, where they had to surrender after vigorous resistance to the Chinese team. In 2011, 2012 and 2013 he was voted coach of the year by the Association of German table tennis coaches (VDTT).*

*„Rossi“ managed a good transition from the active playing carrier to being German National Coach: „I had a smooth transition, because I was assistant coach for two years beforehand. During this period, I was able to settle in and get to know the tasks that lay ahead.“ He did not have any worries that something could go wrong: „I never had any doubts and I was already introduced to a lot in my time as the assistant. On top of this, I had already previously made thoughts on how I could carry out the job successfully.“*

*It requires a lot being in the position of a national coach: „As a player it is much easier because you are only responsible for yourself, whereas as coach you have a rather difficult job and have to take on the responsibility for everyone. However, both of these have their own value and appeal.“ The most important thing is: „I thoroughly enjoy it and the players are satisfied with my work“.*

*He enjoys the successes similarly to those of his active playing career: „You prepare as a team, are part of the team and enjoy the titles and victories together - not much has changed for me really“. In Tokyo it could have been a bit more than „only“ silver: „We were quite close. We should not be satisfied with the role of the „eternal runner-ups“.*

*„Rossi“ is not only the face of the German table tennis sport, but also the face of JOOLA. At the young age of 9, he received his first JOOLA contract and is up until date in business terms and personally connected to the company. His management has been taken care of for „ages“ by JOOLA shareholder and long-time managing director, Michael Bachtler, with whom he has a very good relationship. Rossi says about his connection to JOOLA: „It is a long, always pleasant cooperation, that was a very important factor for my whole career. I have always been able to have complete trust in the make, the management, the employees and the products from the JOOLA company. We have got on really well together for decades.“*

# Classic perfectly designed!

## OLYMP

- original 22 mm JOOLA competition table top
- extremely fast playing surface due to special processed polyester coating
- metal frame 50 mm
- automatic stand-combi system (wheels can be lifted when playing, locking the table in place and leaving it standing on 8 legs)
- stable, powder-coated metal undercarriage
- corresponds with EN 14468-1 A

### CITY

- table made of an acrylic resin/silicia sand mixture
- playing surface coated with a layer of acrylic resin, thus very even and free of pores, providing proper playing conditions
- absolute weatherproof – proven against frost, heat, UV radiation and temperature fluctuations
- undercarriage made of solid rectangle tube 50/40 mm, hot-dip galvanised, dismantlable
- assembled by two persons without any problems, despite a total weight of 293 kg (the heaviest part only weighs 78 kg)
- because its very solid construction ideal for public places, schoolyards, camping grounds
- foundations are not necessary, only level ground
- corresponds with EN 14468-1 C

Art. 11700 green

### EXTERNA

- table made of fibre-glass reinforced polyester
- very even surface for perfect playing conditions
- absolute weatherproof – proven against frost, heat, UV radiation and temperature fluctuations
- solid undercarriage made of substantial rectangle tube, hot-dip galvanised
- easy assembly of legs
- due to its very solid construction, ideal for public areas, school playgrounds, camping sites
- foundations are not necessary, only level ground
- weight 128 kg
- corresponds with EN 14468-1 C

Art. 11800 blue

#### Net CITY

- suitable for table city
- very stable full metal construction, weatherproof
- very substantial and difficult to maliciously remove from the table

Art. 31018

#### Net EXTERNA

- suitable for table externa
- very stable full metal construction, weatherproof
- very substantial and difficult to maliciously remove from the table

Art. 31019

## SUNNY

- assembled ready-to-play - unpack, swing open, have fun!
- 22 mm improved sandwich aluminium plates
- appealing plastic frame 50mm
- stable, powder-coated metal undercarriage
- Super-compact-System
- can be easily set up or dismantled
- anti-tilting device
- absolute weatherproof table with excellent playing features for the ambitious leisure player
- corresponds with European Standards EN 14468-1 C leisure sports (high quality)

Art. 11620 blue

# For ambitious *leisure players!*

## MIDSIZE

- Medium sized leisure table
- ideal for small areas for real table tennis
- Net and post set included
- Dimensions: 168 x 84 cm, height 76 cm

## EUROPALIGA

- extra solid metal net and post set
- micro vertical adjustment system
- storing bag included
- excellent price to quality ratio
- corresponds with EN 14468-2 A

Art. 31025

## SPRING

- solid competition net and post set
- net made of cotton-steel thread
- micro vertical adjustment system
- clip system with strong spring snap clamp
- ITTF approval
- corresponds with EN 14468-2 A

Art. 31050

## PERMANENT 13

- stationary net and post set especially for the tables ROLLOMAT, OLYMP and 5000 from construction year 2013 onwards
- disassembly not necessary
- corresponds with EN 14468-2 A

Art. 31042

## KLIKK

- solid metal net and post set with vertical adjustment
- clip system
- corresponds with EN 14468-2 B

Art. 31011

### STANDARD scorer

Practical plastic construction. Space-saving practical design to protect against damage. With additional pockets for "TIME-OUT" and "HOME/GUEST" display. Numbers 0-30.

Art. 22410

### POINTER scorer

Robust, durable manufacture, easy to handle, simple to set up and take down with an attractive design. JOOLA scorer pointer is ideal for club use, as even when intensively used the plastic parts won't pull out. Includes time out cards.

Art. 22404

### RESULT scorer

Compact plastic scorer with numbers 0-30.

Art. 22402

**NEW**

### SERVICE PRACTICE NET

The new JOOLA catch-net - no more annoying collecting of the balls. Compact to store and easy to use are the essential characteristics of the new JOOLA catch-net. The practical folding mechanism, the good finish, the clever rolling system and the easy handling make the catch-net an essential helper, especially when practising serves or doing bucket-ball.

Art. 21145

### BALL COLLECTOR

Handy „Ball-Collector“ with a practical telescopic pole which makes collecting the balls after each training session a lot easier. Foldable upper part, therefore very little storage space required. Collection net opening: 40 cm, Total length: 2 m

Art. 22720

### TOWEL BOX

Practical, low-priced and stable towel box. Suitable for multi use.

Art. 22545 black

### UMPIRE TABLE

Matching the JOOLA scorer. Elaborate folding construction, no lose parts, with carrying handle for easy transport. Chosen for many international events and suitable for club use. L 76 cm, H 69 cm, D 34 cm.

Art. 22500 black

**JOOLA®**

# The most sold **TT-Robot** in Germany!

## TT-BUDDY PRO

The TT-BUDDY PRO was awarded with the Plus-X-Award Seal of Approval in the categories design and functionality. The judging panel accredited the TT-BUDDY not only a great design, but also noted the simple and logical operability of the TT-BUDDY. The advanced TT-BUDDY PRO with a built-in oscillator and remote control.

The PRO version is also set up and ready to use in seconds. The ball frequency of the robot can be adjusted from 20 to 70. Underspin and topspin as well as oscillation speed are adjustable.

- Weight: approx. 1.1 kg
- Dimensions: 48 x 28 x 28 cm

Art. 21129

## TT-BUDDY

The TT-BUDDY is an innovative robot in modern design. It plays chop, topspin or heavy topspin balls and holds up to 100 balls. Due to its size and easy operation it is the perfect training buddy, suitable for leisure or club players.

Technical features:

- Fast setup with no tools or extra equipment necessary
- Variable frequencies: from 12 balls/min - 70 balls/min
- 3 different spins: underspin, topspin, heavy topspin
- Easy & simple controls
- Very low weight (approx. 1.1 kg)
- Easy storage (Dimensions: 48 x 28 x 28 cm)

Art. 21127

## TT-BUDDY TOPSPIN

The TT-BUDDY TOPSPIN is the ideal training partner for beginners. The ball frequency can be easily programmed with the remote control. Topspin balls are ejected, the ball compartment holds 100 balls. The TT-BUDDY TOPSPIN is set up and ready to use within seconds.

- Spin type: Topspin
- Batteries: 6AA batteries (not included), can also be powered by an adaptor
- Weight: approximately 1,1 kg
- Dimensions: 48 x 28 x 28 cm

Art. 21130

## Net TT-BUDDY

Economically priced, practical ball collection net for the TT-BUDDY. Easy and fast assembly, fits on the table with nets on the sides. The collected balls fall into a container or bucket (not included) through an opening, making it simple to refill the tt buddy ball container.

Art. 21128 black

## A/C ADAPTER

Suitable for use with all Buddy robot models

Art. 21149

**JOOLA<sup>®</sup>**

### Robot **SHORTY**

The multifunctional table robot JOOLA ROBOT SHORTY is very easy to operate. Variable speed, 8 different rotation modes, different trajectories and oscillation provide a variety of training and application.

Collecting net, remote control, large ball container and very easy installation and dismantling make the JOOLA ROBOT SHORTY an indispensable device for all training needs.

# MAXXXIMUM SUXXCESS

JOOLA MAXXX® –  
the rubber with the Triple X:  
MaXXximium Power  
MaXXximium Spin  
MaXXximium Control

## MAXXX® 400

Pimples in. 1.8, 2.0, max. mm.

The rubber with the softest sponge of the MAXXX series (40°). Recommended for aggressive allrounders who emphasize control but don't want to do without the necessary power in performance.

Art. 70320

Strategy	ALL/OFF
Speed	fast/extreme
Spin	extra high
Control	high/extra high
Hardness	40°

## MAXXX® 450

Pimples in. 1.8, 2.0, max. mm.

The dynamic 45° Medium Geo Sponge in combination with the new upper rubber surface provides the optimum mixxx of power, spin and ball response. Ideal for spin-oriented attackers, also playing from half distance, who emphasize ball feeling.

Art. 70326

Strategy	OFF/OFF extreme
Speed	extreme
Spin	extra high
Control	high
Hardness	45°

## MAXXX® 500

Pimples in. 2.0, max. mm.

The fastest and most dynamic rubber of the MAXXX series. The rubber is hard due to the 50° sponge, which is being used for the first time worldwide. However, the new dynamic macropore comb combination (Geo Sponge Technology) and the new pimple geometry (Geo-Force Technology) provide extreme sensitive feeling and good spin. Ideal for players with a busy training schedule who prefer harder rubbers and have been on the lookout for the 3 X-factors of a rubber.

Art. 70332

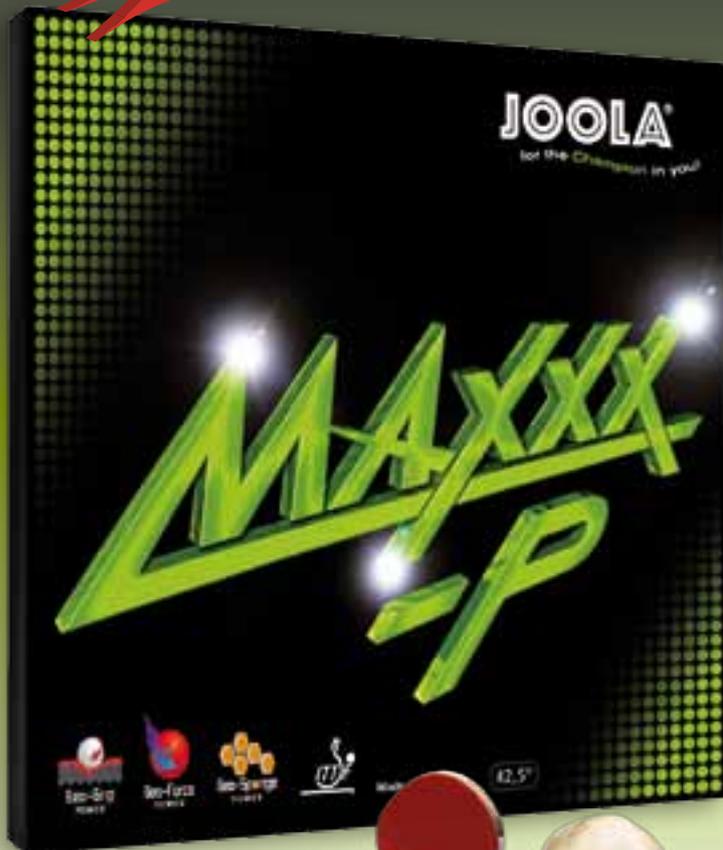

Strategy	OFF/OFF extreme
Speed	extreme
Spin	extra high
Control	low/medium
Hardness	50°

**NEW**

**P like precision**

**P like professional**

**P like Poly-ball**

### MAXXX® -P

Pimples in. 2.0, max. mm.

The JOOLA-MAXXX rubbers with the Triple X Factor!

MaXXimum power, MaXXimum control and MaXXimum spin are now being completed with a new variation that is even more dangerous.

The new GeoGrip-Power-Technology with the even more intense friction surface is ideal in connection with the special pimple arrangement and the large macropore structure of the sponge for perfect topspin balls at the highest speed. These characteristics come to be an advantage especially when playing with the new Poly-ball.

Due to it being a slightly softer version with a sponge hardness of 42,5°, the MAXXX®-P is ideal for ambitious players, who lay emphasis on control and ball feeling.

Art. 70345

Strategy	ALL/OFF
Speed	extreme
Spin	extra high
Control	high
Hardness	42,5°

**Find out for yourself!**

**Geo-Grip**  
**POWER**

**Geo-Grip-Power-Technology**  
This develops significantly more grip of the ball for more spin due to an intense friction surface structure.

**JOOLA®**

## RHYZM

Pimples in. 2.0, max. mm.

Especially developed for the topspin player who plays an aggressive offensive game with extreme power, dynamics and rotation. The new, extremely grippy and spin elastic upper rubber combined with the 48° sponge provides rotation and piercing force as never before. Despite the sensational power, JOOLA RHYZM offers extreme control in passive play, whether in a short touch game over the table, chopping or offensive topspin game. At all times JOOLA RHYZM provides a new dimension of playing fun.

The JOOLA RHYZM brings rhythm to the game.

Art. 70279

Strategy	<b>OFF-/OFF extreme</b>
Speed	<b>extreme</b>
Spin	<b>extra high</b>
Control	<b>medium/high</b>
Hardness	<b>48°</b>

## RHYZM 375

Pimples in. 2.0, max. mm.

The advanced and grippy Rhyzm surface combined with the soft large-pored sponge, provide a special "groove" at the table. The ball contact time, extended by the soft sponge, provides precise ball response and highest control values in all playing situations. Especially when blocking, in counter duels or in return of service, the enhanced ball control is noticeable.

Art. 70287

Strategy	<b>DEF extreme/OFF</b>
Speed	<b>fast</b>
Spin	<b>extra high</b>
Control	<b>extra high</b>
Hardness	<b>37,5°</b>

## RHYZM 425

Pimples in. 2.0, max. mm.

The JOOLA RHYZM 425 is the ideal compromise for all players that expect a best possible ball response, but at the same time cannot do without the power of an extremely hard sponge, as preferred by table tennis professionals. The advanced Rhyzm surface guarantees full dynamics, extreme spin and fun when applying different spins. The RHYZM 425 unfolds its full potential especially in topspin rallies. Choose the RHYZM 425 and experience fun in playing like never before!

Art. 70292

Strategy	<b>ALL/OFF extreme</b>
Speed	<b>fast/extreme</b>
Spin	<b>extra high</b>
Control	<b>high/extra high</b>

**Kamal Sharath Achanta**  
India

### **RHYZM-P**

Pimples in. 2.0, max. mm.

RHYZM – on the market for 2 years and already almost a classic!

The focus fell on development and improvement of the sponge up until now, whereas here a much improved rubber surface has been precisely worked upon. This has led to the rubber having substantially more grip, with which not only more spin can be generated, but also better control and the durability is improved.

Ideal also for use with the new Poly-ball.

Art. 70361

Strategy	<b>OFF-/OFF extreme</b>
Speed	<b>extreme</b>
Spin	<b>extra high</b>
Control	<b>high</b>
Hardness	<b>45°</b>

**NEW**

**Find out for yourself!**

**Use the P's in your game and become even more successful!**

**JOOLA®**

## X-PLODE

Pimples in. 1.8, 2.0, max. mm.

Since the banning of speed glue, the X-PLODE with incorporated speed glue effect caused a sensation among players, who were seeking an alternative for the speed provided by speed gluing. The spin elastic, very grippy upper rubber in combination with the medium hard, large-pored sponge characterise the X-PLODE. The unprecedented catapult effect and the sensational spin provide "x-plosive" strokes with unrivalled rotation.

Art. 70161

Strategy	<b>ALL/OFF extreme</b>
Speed	<b>extreme</b>
Spin	<b>extra high</b>
Control	<b>medium</b>
Hardness	47,5°

## X-PLODE SENSITIVE

Pimples in. 1.8, 2.0, max. mm.

The softer version of the X-PLODE!

The sensitive-touch effect conveys ball feeling of a special kind. While the first ball contact is extremely sensitive and therefore controlled, the rubber shows its full power at the ball take-off: the ball catapults like an "ex-plo-sion" off the rubber.

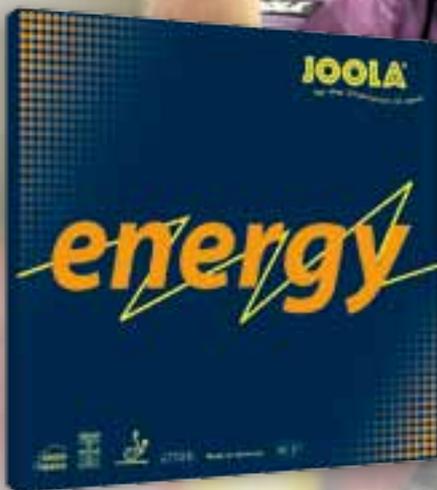

The latest JOOLA Green Power technology in the X-PLODE SENSITIVE provides an unique, incorporated speed gluing effect!

### ENERGY

Pimples in. 1.8, 2.0, max. mm.  
 Speed glue effect is incorporated to a new dimension: ENERGY in „GREEN POWER“ technology. With ENERGY GREEN POWER almost 100% of the possible increase in performance achieved by fresh gluing is permanently built in. Specially suited for players that prefer spin attack but demand control and precision.  
 ENERGY GREEN POWER – the new era has begun.

Strategy	OFF-/OFF
Speed	fast/extreme
Spin	extra high
Control	high
Hardness	42,5°

### ENERGY 325

Pimples in. 1.8, 2.0, max. mm.  
 The ENERGY family has been expanded with an extremely soft version. The highly elastic upper rubber in combination with the 32.5 ° sponge boosts the ball contact time and causes a higher ball trajectory. Safe block balls, also against extreme topspin shots, are another feature of the new ENERGY 325. Players that want to be successful with a lot of control and safe topspins cannot avoid using the ENERGY 325 !

### ENERGY X-TRA

Pimples in. 1.8, 2.0, max. mm.  
 The ENERGY X-TRA is the next-stage development of the ENERGY, the alternative to speed gluing. The 37.5° soft sponge with the inclusive speed glue effect provides for even more spin and speed. It is especially suited to players who put emphasis on control of their strokes without giving up the advantages of speed gluing.  
 Green Power – incorporated speed gluing effect.

## SAMBA

Pimples in. 1.8, 2.0, max. mm.

Nothing sounds better! The most popular JOOLA rubber, due not only to its fantastic sound when speed glued but also because of its longevity, excellent spin and optimal feeling. For years players around the world have appreciated the combination of non-skidding upper rubber and the soft, super-elastic caoutchouc underlay. And for many players the SAMBA is still the ultimate because of its spin features.

## SAMBA PLUS

Pimples in. 1.8, 2.0, max. mm.

Finally the big brother of the most played JOOLA rubber in recent decades is available. JOOLA classic now with incorporated speed gluing effect, that brings back the legendary Samba Sound into table tennis halls. The new SAMBA PLUS outshines all previous sound machines. Development and testing by a team of rubber developers, led by table tennis legend Jörg Roskopf, has been a lengthy process but the new SAMBA PLUS is now ready for the market. The result is an optimum composition of feeling, speed and rotation with phenomenal sound and effect. The SAMBA PLUS sets new standards in development of soft rubbers with incorporated speed glue effect.

## MAMBO

Pimples in. 1.8, 2.0, max. mm.

JOOLA MAMBO is manufactured in Japan using a revolutionary technology: The proportion of chemical packing material in the sponge and in the upper rubber are increased to the maximum permitted levels. This technique has a positive influence on the feeling of the ball and the sound without losing flexibility and speed. The result is a super-flexible and perfect rubber.

Art. 70201

Strategy	ALL/OFF extreme
Speed	fast
Spin	extra high
Control	high
Hardness	40°

## MAMBO H

Pimples in. 1.8, 2.0 max. mm.

JOOLA MAMBO H is a high technology High Friction rubber. The sponge is slightly harder than that of conventional Mambo. With a special gluing technique the upper rubber, which is already designed for extreme tension, is then combined with the sponge. This results in an unbelievable natural energy. This, in combination with the extreme grippy upper rubber surface, makes it a rubber with a lot of spin.

# The price alternatives!

## UPP

Pimples in. 1.6, 1.9, max. mm.  
New well-priced JOOLA rubber that meets high demands. The medium hard, green sponge combined with the extremely grippy surface provides excellent "speed feeling" and also suits the player that needs full power far away from the table. JOOLA UPP is not for beginners but an alternative for players who request an adequate and top modern competition rubber at an attractive price!

Art. 71120

Strategy	DEF extreme/OFF-
Speed	medium/fast
Spin	extra high
Control	high
Hardness	35°-37°

## NOVIC

Pimples in. 1.9, max. mm.  
Brand new JOOLA rubber at a fantastic price! JOOLA NOVIC has a medium to hard sponge. The surface is extremely grippy, hard topspin shots with a lot of rotation can be played without any problems. In passive play the JOOLA NOVIC provides excellent control and leaves nothing to be desired. Also suited for players in higher playing classes!

Art. 71130

Strategy	ALL/OFF
Speed	fast
Spin	high
Control	medium/high
Hardness	37°

## 4 YOU

Pimples in. 1.5, 1.8, 2.0 mm.  
The logical answer, to offer a low-priced rubber for the player with a low budget. Don't be fooled by the price, this is not a rubber for beginners, but an offensive allround rubber of the best Japanese quality - ideal for the controlled offensive player. The rubbers are ideal in combination with the blades ROSSKOPF ALLROUND or EAGLE MEDIUM. Amazing value for money.

# Chen Weixing

42 years old and not even a little bit tired of table tennis – that is Chen Weixing, one of the great, outstanding figures in world table tennis and the idol of hundreds of thousands of defensive players around the whole world.

The table tennis professional, born on the 27th of April 1972 in Mongolia, has been playing for years at SVS Niederösterreich, the top club in Austria, where he has celebrated several national and international achievements. The likeable Asian, who has been an Austrian citizen since October 2000, won amongst other things, the Champion League with the SVS.

Initially it did not look like it was going to be an extraordinary table tennis career. The 173cm tall celluloid artist didn't get the opportunity to develop his table tennis style in China – back then the defensive style wasn't very popular. In his home country he "only" became no. 15, which wasn't enough to receive a chance to play international table tennis.

However, he had the firm desire to become a very good player and cause sensations in international table tennis – if Chen wants to achieve something, he goes for it. He moved to Europe, first to Hungary, then to Germany where he was under contract for two years at the former Federal League club TTG RS Hoengen, winning the ETTU cup in 2000.

Shortly afterwards he went to Austria, where he settled down for good. He is married to Xue Weixing and is father of two daughters – the family lives in Stockerau in Lower Austria, 25 km northwest from Vienna – and currently is no. 42 in the ITTF ranking list. His best position was no. 9, which he had for nine consecutive months from March to November 2006. During his career he was often among the top 20 of the world, for example from January to September 2007 continuously and later again in the summer of 2010.

His CV is filled with sporting achievements, not to forget those with Austria's national team. We will not go through the whole list, but only mention a few highlights. For example, the shake-hand player with an impressive career, made possible by his second chance, who recently reached the quarter finals at the World Championships in Tokyo with his team and they were only stopped by the later champions China, became European doubles champion in 2002 and mixed champion in 2003 and 2005. However, in 2005 there was an even better success, namely the European Team Championships title with Austria. One year later he finally achieved the first Pro Tour title, winning the doubles competition at the Chile

Open together with Robert Gardos. The several time Austrian champion was also successful in the United States. In 2008 he firstly became the singles champion of the US Open and also won the North American Team Championships. One year later he became doubles champion together with Jörg Roßkopf at the US Open. The defensive artist, with forehand shots with a lot of spin and dangerous blocks at the table, didn't make the very big table tennis career in China – the decisive step was made in Europe – however, he is highly appreciated and famous over there. From the players under contract in Europe, only Timo Boll can compete with him regarding popularity. Chen is again and again invited to the Chinese national team training camps when the best strategy against variable defense has to be studied. The top Chinese players like Wang Hao, Ma Lin, Zhang Jike, Xu Xin or Ma Long do not only know him very well, they also appreciate the Austrian by choice very much. The same applies to China's coach, idol Liu Guoliang. On top of this, the chief coach and sports minister have been friends of Chen's for a long time. They all know, what they have in the "Austro-Chinese". Chen Weixing: "The Chinese can practise very well with me and therefore frequently invite me."

Looking back, he names the most important moments of his career as: „previously reaching the quarter finals at the World and European Championships and becoming European doubles champion." However, he doesn't think of quitting: "I still have a very good feeling and just like to play very much." Moreover, he has one big goal: "In any case I want to play for Austria at the Olympic Games in 2016."

Chen Weixing has a great talent for show. He is the born table tennis entertainer and can regularly be found at exhibition matches, where he knows exactly how to amuse the audience and get them involved in funny dialogues. Chen: "I like to do exhibitions because I like the audience to have fun. Moreover, it is very good promotion for table tennis." The man just has a sense of humour. Even at serious competitions, where a lot is on stage, he is laughing or making funny remarks. However, don't let yourself be fooled, Chen always wants to win when he is at the table. More often than not he is successful.

He has an exact concept on which material guarantees success. Chen is world-wide on the move as a representative of JOOLA. In addition to this, he is closely involved in the development of JOOLA blades and rubbers and supports the well-known equipment supplier with all his experience.

## TOPSPIN C

Pimples in. 1.2, 1.5, 1.8, 2.0 mm.

The TOPSPIN C uses the surface of our old Topspin rubber. The secret of this unique rubber lies in the composition of the sponge. This combination of highly grippy upper rubber with a special sponge results in a defensive rubber for perfectly safe defensive play, extreme variations in chop, and superb response to the opponent's topspin.

Art. 70260

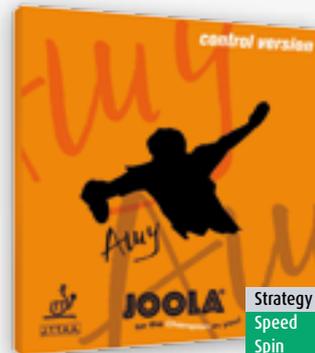

Strategy	DEF/ALL
Speed	low
Spin	low
Control	extra high
Hardness	25°

## AMY CLASSIC VERSION

Pimples in. Anti-Spin. 1.0 mm.

The AMY CLASSIC VERSION has very soft 1.0 mm sponge and is therefore slightly harder to control - however, the spin reversal when blocking is considerably more dangerous. In addition, this rubber also allows attacking and wobble shots.

Art. 71150

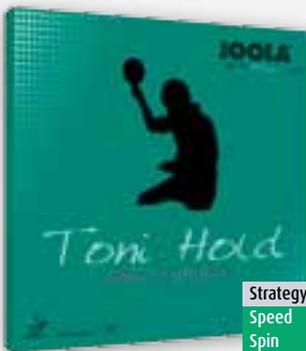

Strategy	DEF-/ALL
Speed	low
Spin	low
Control	extra high
Hardness	48°

## AMY CONTROL VERSION

Pimples in. Anti-Spin. 0.4, 0.7 mm.

The AMY CONTROL VERSION has a novel, very thin sponge, providing good control. Even hard topspins can be returned without any problem. Amy Solja plays with the AMY CONTROL VERSION with a 0.4 mm sponge.

Art. 71160

## TONI HOLD ANTI TOPSPIN

Pimples in. Anti-Spin. 1.5, 2.5 mm.

The original anti spin rubber - unrivalled for total control. The best answer to topspin and strong spin.

Art. 71005

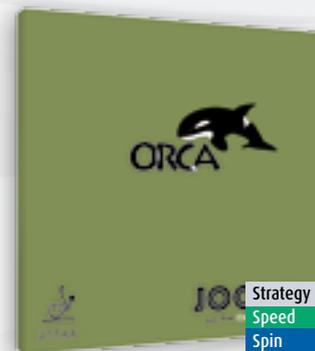

Strategy	DEF-/ALL
Speed	low
Spin	medium/high
Control	high
Hardness	40°

## SHARK

Long pimples. 0X, 0.5, 1.0 mm.

JOOLA SHARK is a long pimples rubber with disturbing effect, which has an extremely high number of pimples. A good disturbing rubber, it has 3 components, the highest possible length of pimples, the highest possible number of pimples and the thin diameter of pimples. This has been achieved almost perfectly with SHARK.

Art. 71170 red

Strategy	DEF-/DEF extreme
Speed	low
Spin	medium
Control	extra high
Hardness	40°

## ORCA

Long pimples. 0X, 0.5, 1.0 mm.

The ORCA can be controlled slightly easier than the SHARK. The number of long pimples is reduced and the pimples are thicker. Therefore blocks and attacking shots are easier to play. ORCA is particularly suitable for the aggressive disturbing game at the table.

Art. 71180

Strategy	DEF-/ALL
Speed	low/medium
Spin	medium
Control	extra high
Hardness	45°

## BADMAN RELOADED

Long pimples. OX, 1.3 mm.

For many players the BADMAN was the best and most dangerous “untreated” long pimple rubber. After the ban of the “treated” long pimple rubbers JOOLA has remade the BADMAN with the latest Tensor technology.

Our defensive experts Chen Weixing and Latin American Champion Liu Song think that the reloaded version of the BADMAN is once again the best defensive long pimple rubber presently available on the market. With BADMAN RELOADED it is possible to play extreme chop shots with dangerous wobble effect - relive the experience of treated long pimples!

Art. 71250

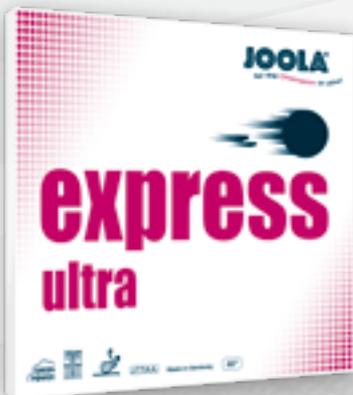

Strategy	DEF-/DEF extreme
Speed	low
Spin	medium
Control	extra high
Hardness	50°

## OCTOPUS

Long pimples. OX, 0.5, 1.1-1.2 mm.

Two of the world's best defensive players, Chen Weixing and Latin American Champion Liu Song rely on the long pimples rubber OCTOPUS. With OCTOPUS you can play extreme chop shots and also add variation by taking the ball early at the table. An extra hard sponge provides extremely awkward effects.

Art. 71100

## EXPRESS ULTRA

Pimples out. 1.5, 2.0, max. mm.

Speed gluing became popular with short pimple players a long time ago. The time is now right to introduce EXPRESS ULTRA, the pimples out version with incorporated speed glue effect - the short pimple designed for professionals and ambitious offensive players.

Art. 70130

## TANGO ULTRA

Pimples out. 1.8, 2.0, max. mm.

A short pimples rubber using the TENSOR effect and the result is not surprising: softer, more control and more spin but also with dramatic effects from the pimples. For passive blocking, TENSOR absorbs the energy but for active blocking and attack the rubber really explodes.

## Rubber Technologies

**Green Power**  
Performance achieved from fresh gluing is permanently incorporated into the rubber.

**Geo-Force-Technology**  
Newly designed pimple arrangement with a more hollow space between the single pimples provides maximum spin and best possible control.

**Geo-Grip-Power-Technology**  
This develops significantly more grip of the ball for more spin due to an intense friction surface structure.

**Tensor**  
Incorporated inner tension in the sponge and upper rubber. More elasticity, more spin, more speed and more feeling.

**Geo-Sponge-Technology**  
Innovative macropore sponge design that increases the catapult effect therefore enabling higher ball trajectories.

### TABLE TENNIS RUBBERS DIFFER AS FOLLOWS:

JOOLA has made the decision to cease using the old numerical system of rubber rating. We believe that our new classification system is easier to understand and that an exact classification into very precise ratings is impossible and highly subjective.

We will keep the traditional categories of playing features, but classification now has only 4 levels:

#### Pimples in

THE „standard“ rubber. Combination of upper rubber (pimples pointing inward) and sponge, available in thicknesses of 1.0 – 2.3mm.

#### Short pimples/pimples out

Rubber with pimples upper rubber (pimples pointing outward). Short pimples are especially use for blocking and counter play.

#### Long pimples

Available without sponge (ox) or with different sponge thicknesses. Long pimples are for blocking/disturbing game at the table as well as chopping from half distance.

#### Anti-Spin

Combination from plain upper rubber and sponge. The plain surface facilitates returning of balls with a lot of rotation (service, spin).

### THE TRADITIONAL PLAYING FEATURE CATEGORIES:

We will keep the traditional categories of playing features, but classification now has only 4 levels indicated by different colours:

Low Medium Fast Extreme

#### Speed

Defines speed of the ball when catapulted from the player's racket. The higher the speed of the blade the higher the ball bounce. For beginners we recommend rackets with with less speed.

#### Spin

Defines rotation produces by hitting the ball. The higher the grip of a rubber the more rotation can be given to the ball by touching.

#### Control

The control value is always proportional to the speed value. In practice rackets with high speed are harder to control than rackets with low speed. In order to sufficiently control with high speed a good deal of practice is necessary.

#### Hardness

In addition the rubbers are classified accordig to the hardness of the sponge (degree). The harder the rubber the more speed. The softer the rubber the more sensitive and controlled.

#### Speed

- low
- medium
- fast
- extreme

#### Spin/Control

- low
- medium
- high
- extra high

## Playing strategies

In order to choose the most suitable equipment every player should decide into which playing strategy they fall.

#### DEF-

Classic, pure defensive play behind the table with occasional attacking shots.

#### DEF

Modern defensive play, also at the table, with positioned offensive shots.

#### DEF extreme

Modern defensive play using special rubbers (e.g. Badman), aimed at disturbing the opponent's offensive play.

#### ALL

All techniques/stroke variations are played. Controlled shots, various rotation shots and positioned shots are more important than speed. One stroke side (usually backhand) is focused on blocking or counter play.

#### OFF-

Various topspin techniques, often from half distance are paramount. Offensive play with precise attacking shots and variation of topspin. Often shots with later hitting of the ball and higher ball trajectory are played.

#### OFF

Dominant topspin strokes from both sides. Topspin is not only the preparing but also the point-making stroke.

#### OFF extreme

Offensive players with uncompromising risk tolerance. Speed oriented stroke and power spin are paramount. Speed is prior to spin and variations.

**NEW**

# TPE

## Top Player Edition

## TPE FEELING

approx. 90 g., 5 Hinoki, Ayous, Kiri

High value OFF blade with an exclusive „burned“ Hinoki top layer. The noble Hinoki which is heated up using a special technique, ensures a high stiffness and consistent, balanced playing features on the whole face of the blade. The employed Ayous and Koto veneers make the blade very controllable without losing much speed.

Art. 61425 flared  
Art. 61427 straight

Speed	OFF-
Control	high

## TPE NATURE

approx. 85-90 g., 7 Limba, Ayous, Ayous, Ayous

A true rarity are very light, natural Limba veneers, which do not only ensure the JOOLA Nature a noble appearance, but also an exceptional feeling. This experience is supported by a seven layer build-up of Ayous veneers. Offensive topspin balls, hard smashes or well-placed block balls, the JOOLA Nature is aggressive but still tame. A playing feeling which every player dreams of.

Art. 61420 flared  
Art. 61422 straight

Speed	OFF
Control	medium/high

## TPE PERFORM

approx. 85-90 g., 5+2 Hinoki, Koto, Carbon, Ayous

A progressed development of the JOOLA classic „Roskopf-Emotion“. The selected Hinoki top layer is specially heated - due to this the blade is even more resistant against bending and guarantees high control even when carrying out the fastest shots. The built-in Carbon fibers not only enlarge the Sweetspot, but also help produce a higher, more spin-orientated ball flight.

Art. 61430 flared  
Art. 61432 straight

Speed	OFF
Control	high

## TPE FIGHT

approx. 90-95 g., 5+2 Hinoki, Koto, Kevlar, Ayous

A special type of Aramid fiber blade. On top of the high value Kevlar Carbon texture (Kevlar owns the largest specific tear resistance related to the weight), only particularly high value and selected materials are used in the production of the JOOLA Fight. The extremely quick blade also allows topspin balls to be played with feeling and a lot of spin. Surprising and point winning speed changes are possible, especially when playing long spin rallies.

Art. 61435 flared  
Art. 61437 straight

Speed	OFF+
Control	medium

JOOLA presents excellent competition blades for ambitious players, who require that something special with the **Top-Player-Edition (TPE)** series. All blades have been developed by working together with our top contracted players and coaches, such as the German table tennis legend Jörg Roßkopf, the world class defensive player Chen Weixing or European champion Petrisa Solja. Compromises in the veneer selection or in the production of the TPE blades have not been made. Even the packaging is exceptional and of high value. The blades stand out due to their noble and elegant simplicity.

Every blade is delivered in the highest quality.

**NEW**

# SPIRIT

*the new blade series*

JOOLA®

**MCS**

MCS - MULTIPLE COMPOUND SYSTEM

The new blade series **SPiRiT** is made using the Multiple-Compound-System (MCS). The core of the blade consists of several veneers, which are first glued horizontally and then sliced up vertically. On top of this, are two traditionally glued layers. This ensures a high bending strength and an exceptional control over the blade. The thicker (stronger) the horizontally glued veneers are, the faster the blade becomes. The MCS-System enables quick blades with high control.

**SPiRiT ALL +**

approx. 80 g., 4+1 Finesline blue, Koto, X (Balsa/Ayous)  
The employed veneers of Balsa and blue Ayous for the 4,5mm strong core make the SPiRiT ALL+ an excellent to control allround blade of the slightly more offensive type with great feeling. The approximately 80g heavy blade lies well in the hand and guarantees fun when playing.

Art. 61305 flared  
Art. 61307 straight

Speed	ALL+
Control	high/extra high

**SPiRiT OFF**

approx. 85 g., 4+1 Finesline red, Ayous, X (Balsa/Ayous)  
The core layer of the SPiRiT OFF is 6mm thick. The thicker Balsa veneer in connection with the red Ayous layers make the blade much faster and less elastic. This guarantees controlled counter and topspin balls at high speed.

Art. 61310 flared  
Art. 61312 straight

Speed	OFF
Control	high

**SPiRiT OFF+**

approx. 90 g., 4+1 Finesline black, Koto, X (Balsa/Ayous)  
The highlight of the SPiRiT series! The 6,5mm thick core (Balsa with black and therefore harder Ayous veneers) guarantees the highest speed and hardest topspins. The optimal bending strength (due to the special gluing of the core) and the employment of the 0,8mm thick Koto top veneer ensure that speed is the greatest aspect of the blade.

# K-series

## K5

approx. 85 g., 5 Samba, Limba  
The JOOLA K5 does not only fall into the category of first class high-tech blades due to its exclusive design! In practice, vibration control is achieved through the RAG technology and the JOOLA "honeycomb", which is almost legendary amongst experts. With these features the K5 has become an established bestseller.

## K6

approx. 90 g., 5+2 Samba, Limba, blue Texalium, Samba  
The K6 with the Round About Grip technology is a blade of the highest quality. The K6 is an offensive blade without compromise - the middle layer made of Blue-Texalium guarantees excellent stiffness which means that it is almost distortion-free and the size of the sweet spot remains consistent. Speed and control of the K6 offer perfect playing balance and the RAG grip guarantees excellent ball feedback.

JOOLA K6 - a modern and extremely ambitious high-tech blade that guarantees all requirements of a competition blade, especially for top players.

Speed fast  
Control medium/high

## K7

approx. 90 g., 5+2 Koto, Red Samba, Carbon NetT, Samba  
The Carbon-NetT-Material was used for the first time in the JOOLA K7. Carbon-NetT is lighter than other carbon fabrics and still provides the wanted stiffness that is responsible for the speed of the blade. The Enzo layers used at bonding provide high control, which can't be taken for granted on carbon blades. The RAG handle, exclusively developed by JOOLA, additionally increases this control.

### RAG-Technology

Unique **Round-About-Grip-Technology** - exclusively only in JOOLA blades. The handle completely incorporates the blade. One Hundred percent precision is guaranteed through manufacturing with a CNC milling machine. By all around gluing of the grip plates with the blade, vibrations are eliminated - therefore a more intensive ball response and increased control for the player.

After the huge success of the EAGLE-series, JOOLA presents once again an optically good-looking blade series with a great value for money. The design of the three JOOLA FALCON blades impresses with a classic, elegant and clear structured line. All blades are made from high quality veneers and are manufactured to the highest quality standards.

### FALCON medium

approx. 80 g., 5 Ayous, Ayous, Tungwood  
Pure control - that is what the 4 Ayous-layers in the FALCON medium stand for. The mid-veneer which consists of „Tung-Wood“ provides the necessary stiffness for hard topspin balls.

Art. 61385	flared
Art. 61386	anatomic
Art. 61387	straight
Art. 61388	penholder

### FALCON fast

approx. 80-85 g., 7 Lymphwood, Ayous, Ayous, Ayous  
7 layered blade with excellent well-controlled offensive characteristics. The top veneers consisting of „Lymph-Wood“ provide the speed, whereas the 5 Ayous-layers are responsible for the required control.

# WING

The JOOLA blade innovation with  
Wing-Shaft-Integration Technology

## WING CARBON

approx. 85-90 g., 3+2 Fineline, CS-Carbon, Kiri

JOOLA Wing Carbon – an uncompromising offensive blade that is already used by many JOOLA players. The medium hard CS (crystal structure) carbon gives the blade an extreme stiffness and because of its fabric structure also enables the development of extremely spinny balls. The Wing handle technology guarantees excellent ball response: the comfortable handle is just remarkably good!

Art. 61345	flared

Control	medium/high

## WING MEDIUM

approx. 80 g., 5 Koto, Ayous, Kiri

WSI technology (Wing Shaft Integration) provides a totally new feel. The handle is integrated into the blade like a wing thus providing excellent stability. The layers of precious Hinoki are aerodynamically shaped into the handle so that the grip fits perfectly in the hand. The combination of veneers provides well-balanced playing features and is ideal for players with a lot of spin and a precise blocking game.

# JOOLA®

## FLAME EXTREME

approx. 90 g., 5 Limba 0.8mm,  
Ayous 1.0mm, Kiri 4.8mm

Pure speed is not the sole motto of the FLAME EXTREME.

The intelligent combination of 5 layers with the 0.8mm Limba inner veneer and the new type of BURNTec outer veneers makes it possible not only for professional players to control this blade.

The unbeatable price-level will allow everybody to try an "extreme" blade.

## FLAME FAST

approx. 85-90 g., 5 Hinoki 0.8mm,  
Ayous 1.0mm, Kiri 3.2mm

The FLAME FAST proves the fact that high speed and good control don't have to be a contradiction.

The precious 0.8mm Hinoki upper layer, in combination with the BURNTec finishing, guarantees an extra class blade for all offensive players. The hard Kiri core veneer provides the necessary torsion rigidity in order to generate maximum power for aggressive top spin shots. A high class blade for all players, that take advantage of top spin play.

## FEVER

approx. 85-90 g., 5+2 Limba,  
Carbon meliorate, Ayous, Kiri

An almost perfect blade with high stability and precise alignment of the centre core.

The lightweight Meliorate Carbon provides not only an extra large sweet spot, but also perfect balance.

The Limba veneers allow you to feel the bounce of every ball and therefore give the blade extreme control.

### EAGLE MEDIUM

approx. 75-80 g., 5 Samba blue, Sapele, Kiri High control, good speed, very low weight and a fabulous price are the secrets of the EAGLE MEDIUM.

The blade that allows ambitious table tennis players the fun of playing table tennis has its origin in a well-engineered and proven production technology. Because of the well-balanced speed and control the EAGLE MEDIUM is also suitable as beginner blade for children and youth training.

**CARBON**

**Now with a new look!**

## ROSSKOPF FORCE

approx. 90 g., 3+2 Hinoki, Carbon, Kiri

For the uncompromising offensive player who wants a hard, direct and modern carbon blade, the ROSSKOPF FORCE is a must. Due to the flat trajectory and the enormous acceleration this offensive blade will convince every player, that wants to force the direct point with fast stroke spins. The exclusive design and the excellent playing characteristics make the ROSSKOPF FORCE a bestseller.

Control	medium/high

## ROSSKOPF EMOTION

approx. 85-90 g., 5+2 Hinoki, Koto, Carbon, Ayous

The carbon fibre core of the blade creates an enhanced sweet spot which results in excellent control. In comparison with other blades with carbon core, the ROSSKOPF EMOTION impresses with a relatively soft feel and a high trajectory, due to the specially selected Hinoki surface. The blade offers the best possible balance between feeling in passive and speed in active play.

Chen Weixing  
Austria

Now with a new look!

Now with a new look!

### CHEN DEFENDER

approx. 90 g., 7 Samba yellow, Samba, Enzo, Samba  
For some time, the Chen Weixing Defensive blade has been one of the most popular defensive blades. Working with the world class defensive player from Austria, we have developed another blade designed for extreme defensive players.  
The CHEN DEFENDER is an oversize blade with considerably more control. The Enzo glue layer between two Samba veneers provides greater control and tremendous feel of the ball.

Art. 64335 straight

Speed	low
Control	extra high

### CHEN WEIXING

approx. 90 g., 5+2 Limba, Koto, Black-Cloth, Kiri  
Designed by Europe's best defensive player, it is best suited to a variable and controlled chop defensive game. However, fast topspin shots, as played by Chen Weixing, are also possible without any problem.  
The layers of black-cloth in the construction provide increased control.

Art. 64330 flared  
Art. 64325 straight

Speed	medium
Control	extra high

### TONI HOLD WHITE SPOT

approx. 85 g., 5 Pappel  
The defensive classic blade!  
Specially suitable for anti-top rubbers. The cottonwood veneers are extremely soft and very slow providing great control.

Art. 64300 straight

Speed	low
Control	extra high

# For Kids only!

## ROSSKOPF JUNIOR

approx. 80 g., 5+2 Limba, Abachi, Black-Paper  
The ROSSKOPF JUNIOR is the exact reproduction of the ROSSKOPF ALLROUND. The blade is specially designed for children with a smaller and thinner handle. In order to keep the balance of the blade the surface is slightly smaller. The result is the ROSSKOPF JUNIOR, the ideal blade for children.

Art. 67115 flared

Speed	medium
Control	medium/high

## CHEN JUNIOR

approx. 70 g., 5 Koto, Mahogany Tungwood  
Chen Weixing has applied the knowledge gained from training with young Chinese players. It is well-balanced for a child's hand. Ideal relation of speed and control for learning basic strokes.

Art. 64340 flared

Speed	medium
Control	extra high

## TPE FEELING XS

approx. 80 g., 5 Hinoki, Ayous, Kiri  
The JOOLA TPE Feeling has exactly the same construction and is an XS-version with a smaller face and thinner handle. Ideal for ambitious children.

Art. 61428 flared

Speed	OFF-high
Control	high

## WING MEDIUM JUNIOR

approx. 80 g., 5 Koto, Ayous, Kiri  
The classic JOOLA blade Wing Medium is now also in a special child and youth version available. It is the first time that the JOOLA WSI technology is being employed in a junior blade. In this procedure, the handle is drawn into the face of the blade in the shape of a wing, giving the blade an improved stability. The built-in elements, which are made of high quality Hinoki, are sanded down in the handle so that they are extremely round. This develops an amazing feeling of the handle, especially for small hands.

As with the rubbers, JOOLA has made the decision to cease using the old numerical system of rubber rating. We believe that our new classification system is easier to understand and that an exact classification into very precise ratings is impossible and highly subjective.

The blade design will incorporate the following characteristics which also make JOOLA blades very distinctive:

#### Colour coding of speed

In our view, the decisive factor for classification of a blade is speed. Therefore we will base all playing categories on the speed of the blade. The speed features are classified into different colours.

The colour of the speed features is also repeated in the design of the handle lense.

#### Classification on the blade face

For instant recognition, the characteristics are clearly displayed on the blade face. Again the colour of the print identifies the speed and the level of control is also displayed.

#### Handles

#### Playing strategies

DEF-	DEF	DEF extreme	ALL	OFF-	OFF	OFF extreme
Classic defensive orientated game away from the table with an occasional attacking shot.	Modern defensive game, also close to the table, with placed attacking balls.	Modern „material“ game with special rubbers (e.g. Badman), with the aim to disrupt the opponent's attacking game.	All techniques/shots are played. Controlled shots, variation of spins and placement are more important than speed. One side, usually the backhand side, is focused on blocking or counter shots.	Variable topspin techniques, often away from the table, are in focus. The balls are mostly played with a later contact point and have a higher ball flight.	Game-determining topspin shots from both sides dominate the game. The topspin is not only the set-up, but also the point-winning shot.	Offensive player who plays with a lot of risk. Speed-orientated and power-topspins stand out from other shots. Speed is more important than spin and variation.

#### Blade Technologies

##### MCS - Multiple Compound System

The veneers are block glued, and afterwards cut across and glued again.

##### RAG

Round-About-Grip is a handle developed by JOOLA which integrates the complete blade into the handle.

##### Flow glue

Glue used in aeroplane construction provides an extremely hard, almost vibration free blade.

##### Junior blade

Blades especially designed for a child's hand, with smaller blade and shorter handle.

##### CARBON

The classic among the used fibres. Increased the sweet spot, reduced vibration.

##### CARBON CS

Extra catapult effect for speed and spin.

##### meliorate CARBON

Very hard and expensive carbon material. Large sweet spot, unrivalled control.

##### WSI (Wing-Shaft-Integration Technology)

The JOOLA blade innovation with Wing-Shaft-Integration Technology Wing-shaped handle reinforcement.

##### BURNtec

Almost warp-free blade with moisture removed.

##### Balsa

Soft power with extra feeling at lowest weight!

##### Texalium

Aluminium coated fiberglass fabric, large sweet spot, good acceleration.

# Kamal Sharath Achanta

*Kamal Sharath Achanta has a great, exotic personality and aura. He is a fighter full of emotion on the table, but off the table calm, helpful, held-back and distinguished - not only does he fit perfectly to JOOLA's philosophy as a player, but also as a person. Born on 7th December 1982 in the East Indian city of Machilipatnam (population of 180.000 people), the 1,85 meter tall table tennis professional is one of the most-liked players and has numerous fans worldwide.*

*He comes from a real table tennis family: father Srinivasa Rao and uncle Muralidhara Rao have already been successful coaches, even before Sharath Kamal was the light of day. They brought some players up, who were under the best in the country. The brother, Rajath Kamal, also plays excellent table tennis and has been a member in the past of the Indian national team.*

*Intensively pushed by his father, who has his own table tennis academy, he decided to become a table tennis professional at the age of 16, throwing away the option of pursuing an academic path. Even as a small child, he trained with enthusiasm at his father's training centre in the South Indian city of Chennai.*

*These days, due to his exceptional playing level and his team-player qualities, Kamal is a highly sought after player. The record champions and title candidates, Borussia Düsseldorf, were extremely pleased to prolong the contract with him in advance. The actual number 38 world-ranked player, who has also worn the dress of Gräffeling and Bremen, was really unlucky in 2012 as he left Bremen to go to Italy. He had decided to play for the seemingly ambitious first league club called Siracusa, who had to withdraw from the league because of financial problems. The deadline to change clubs had already expired at this time, meaning that Achanta could not sign for another club.*

*Without a club, he kept himself fit at the Düsseldorf training centre, where he was initially signed up by Borussia in 2013 as a replacement for the injured Christian Süß. However, it could be seen quickly that the sympathetic South-Asian player was much more than just a reserve. Knocking up an average of 13:7, he belonged to the most reliable Bundesliga players of the season. He nearly always won when it was close for the team and when the points were really needed.*

*Achanta is also extremely successful on the international circuit. He has not only had good results on the World Tour, as well as the Asian Games and Asian Cup, but has also had numerous successes at the Commonwealth Games. For an Indian player, which of there are astonishingly more professionals than in Germany, this has a huge status. Achanta stood right at the top of the podium in 2004 in Kuala Lumpur and 2006 in Melbourne. In 2009 in Glasgow he „only“ won the silver medal, but for that won gold in the doubles, which he repeated a year later in his native New Delhi.*

*He is without a doubt the most popular player in his homeland. However, he can not complain about the strength and motivation of the competition from the clearly emerging table tennis country, where an ex-German national squad player, Peter Engel, is the head-coach. Due to this, the three-time Olympic participant does not have a walk-over when playing the Indian National Championships, but has to play at his limits to prove himself.*

*When he is not standing at the table, the 2010 Egypt Open and US Open winner, who is personally not exactly a daredevil, likes to play football. He also likes to just retreat, watching films, reading literature, listening to music, playing the guitar or taking care of his coin collection. His family is also of huge importance to him in his life. Kamal is married since 2009 and a proud father of his three-year-old daughter.*

*The table tennis ace, who is in the Indian national squad since 2002, has a talent for languages. His English is excellent and his Spanish too. On top on that, he speaks Hindi, Tamil and Telugu, meaning that he can communicate well in his linguistic and culturally quite inhomogeneous, large homeland. His German is also improving from day to day.*

*He does not have to worry that much about his future because since the age of 21, he is under contract with an Indian oil company, for whom he plays tournaments for in India and whom have guaranteed him employment after his playing career. However, if he really wants an office job or not in the future is still open to discussion: „I have not yet decided what I want to do when I stop to play table tennis. At the moment, I can imagine operating after my playing career for JOOLA in India.“ Achanta is a very determined person: „I believe that one should set high aims, believe in them and work hard to achieve them. Only then does one have success.“ He still has high targets to meet: „I want to reach the top 30 in the world in the next few months. At the Commonwealth Games in Glasgow in the summer, I want to win gold. In the near future, it is important to me to get under the top 20 in the world ranking list.*

*The right-hander, who has also played in Spain in the past, stands out with his technically perfect, controlled attacking game, rarely getting agitated on the table. He plays his game and tries to make the opponent play his system - more often than not with success. He is not only just one of many good table tennis players, but a real personality, a guy with charisma and one who, at a World Tour tournament on 24 tables in a huge hall under many players, automatically stands out. This is not only due to his trademark - the headband which perfectly matches the colour of his shirt.*

# Petrissa Solja

*Petrissa („Peti“) Solja comes from a true table tennis family. Her mother, Dagmar Solja Andruszko, played with the ATSV Saarbrücken in the 1st German League in the 1980s. She was an excellent defensive player in Germany over many years and even after ending her career and without practise, she still played very successfully in higher classes for the TTSV Saarlouis-Fraulautern*

*The father also lives table tennis. Pavel Solja was born in the Czech Republic and came to Rhineland-Palatinate in the 60ies. His first station was ASV JOOLA Landau. He won the Palatinate Championships several times and has been a successful and experienced table tennis coach, who successfully passed the first A-license training course of the DTTB and who again and again impresses with his enormous expertise. Pavel still likes to coach his daughters at important tournaments. A character of German table tennis, one who has the sport in his veins, obsessed with table tennis in the very best sense.*

*Sister Susanne, born in 1986 and a defensive player like her mother, was very successful in the cadets and played in the 2nd Federal League from 2004 onwards, without a lot of training effort - a natural talent who probably would have made it further with more ambition.*

*There is not too much to say about the 4 years older sister, Amelie, of course a JOOLA contracted player. She is the sporty the complete opposite to Petrissa and has perfected material play with long and short pimples and antitop. As the DTTB did not offer her the possibility to develop to her limits she aspired, she changed the association. She has been playing very successfully for Austria for a while now – since 2011 she has the Austrian passport and is the undoubted no. 2 after Liu Jia.*

*In contrast, the left-handed Peti plays offensive table tennis on the highest level with a lot of spin and an extremely good hand. There are only a few players worldwide that have a comparable ball feeling and are able to play such dangerous forehand and backhand topspins. With her age of just 20 years, she is among the TOP 40 of the world and has what it takes to make it even a lot further.*

*For years she had been playing in Saarlouis-Fraulautern together with Amelie before they parted their sporting ways. However, Petrissa on whom probably the biggest hopes of the DTTB were pinned, also found her way to Austria. After settling differences with the DTTB she changed to the top team of Austria, Linz AG Froschberg, promptly winning the European premium class. Champions league winners are already her match and after two years she now returns to Germany and will play for the triple winner and JOOLA club ttc berlin eastside, who is looking forward to this superb gain by signing the young world class player.*

*Petrissa's enthusiasm for table tennis was awakened at an early age, inspired by the parents and sisters: "I started when I was five years old. I always wanted to play, but back then I was still too small for the table and I got up on my toes. I remember steadily playing the ball against the wall with my racket." Peti is happy to come from a table tennis family. "I like it like that, I don't feel under pressure at all. It is easier because everybody understands me." The competent and critical eyes of her parents and sisters don't disturb her rhythm. "This doesn't make me nervous. I am happy if there is an event where my whole family can watch." The relationship with sister "Amy" was always great, there was no jealousy: "I can't remember any competition between us. Only that she always came home with a lot of medals and as her younger sister I always wanted to imitate her." She knows very well that it is not easy to win against Amelie: "The score between us is about 50:50, sometimes she wins, sometimes I win."*

*Petrissa frankly admits her weak point: „I deal with defeats too long, longer than necessary." Despite her still young career, she can look back to many highlights. "I had a lot of beautiful moments", Petrissa says and lists: "Two times winner in the cadet singles and two times second in the girls singles at the European Youth Championships, bronze at the World Junior Championships in India, winner of the German ranking list tournament for women, German runner-up in the women's singles, two times gold at the European Championships in Schwechat and not to forget first in the German Championships in Bamberg in the doubles. All these were special moments for me." She adds: " Also the German Open in Bremen with winning the U21 and women's doubles competitions are unforgettable, as the entire hall stood behind me/us.*

*Even at the age of ten Petrissa signed her first contract with JOOLA and ever since has been playing with blades and rubbers of the German traditional company. She describes her special relationship to her sponsor: "I come from the Palatinate, I live only 15 minutes away from JOOLA and our whole family has always been supported by JOOLA, at traineeship for preparing for my vocational diploma or the apprenticeship of my sister Susanne at JOOLA. JOOLA and its staff almost belong to my family. I am happy that I am supported so much.*

*Petrissa also has a life besides table tennis: „I do what young people usually do. Lately I devote my attention to furnishing my new camper van with the help of my father." It is important to know that a camper van belongs to the Solja family like rackets and balls. Major tournaments are only complete if the perfectly furnished camper van of the Soljas can be found on the parking lot besides the hall. This attraction has also become second nature for Peti: "We have been driving camper vans for 30 years. Be careful, it is contagious!"*

# JOOLA RAPID

*The top class TT shoe!*

**NEW**

## **Speed absorber**

*supports quick changes  
in movement*

## **Non-slip soles**

*For secure grip*

## **Two colour look**

*modern design – in a com-  
bination of two colours*

## **nubby inner sole**

*against foot fatigue*

## **Upper material**

*soft and durable*

## **RAPID**

The new JOOLA shoe "Rapid" presents itself in a modern two-colour look. As well as the striking colour design, "Rapid" stands out with its technical details. The absolute non-slip sole with extreme soft speed absorbers, already proven in the JOOLA top model B-Swift, leaves nothing to be desired and is ideal even for world class players. A special nubby inner sole provides best possible wearing comfort and reduces symptoms of fatigue in the foot. The complex manufacture from soft and sturdy leather make "Rapid" a top quality, extraordinary table tennis shoe.

Size: 36 - 45

Art. 98270 black-lime  
One pair of green and one pair of white laces are included.

Art. 98282 blue-white  
One pair of white and one pair of blue laces are included.

**JOOLA®**

## TOUCH 13

The classic among table tennis shoes has been upgraded with a new appealing "outfit". The sole, manufactured in the same way for many years, stands for excellent non-skipping features. The upper material has now been revised and especially the seams and design have been improved. Therefore, TOUCH is still the model for all leisure table tennis players.

Size: 36 - 46

Art. 98141

## B-SWIFT

An absolute highlight among table tennis shoes. The modern and yet functional design is specifically tailored to the demands of top performance table tennis.

The newly designed sole with incorporated, extremely soft speed absorbing components, perfectly transform even the fastest changes in movement and therefore help to implement the sensed playing situation to footwork.

The JOOLA top players Chen Weixing and Daniel Habesohn (European Champions doubles 2012) have used this shoe during the last months in competitions and are very satisfied.

Size: 36 - 45

Art. 98127

**JOOLA®**

## AIROW

JOOLA AIROW is a reasonably priced and lightweight table tennis shoe with a very soft sole guaranteeing excellent skid resistance. In the Asian region this shoe has already been used by players of all playing classes with highest satisfaction

Size: 36 - 46

Art. 98257

## RALLYE

The top shoe from JOOLA for players of the highest standard. The uppers are made from breathable mesh and functional micro fibre which guarantees excellent breathability and comfort. In the sole the proven phylon material is used, making it very light and slip-resistant. The legendary EVA inner sole in combination with the new supination support prevents the foot from deviating outwards. The RALLYE has been developed for the ambitious player demanding an extremely lightweight, non-slip and flexible table tennis shoe that also reduces heavy strain on the joints.

Size: 35 - 47

# For Kids only!

**NEW**

## PRO JUNIOR

For the first time, JOOLA introduces a shoe specially designed for children. The Pro Junior has a non-slip sole that has been established for years. The EVA mid-sole protects children's joints from too much strain during the growth period. The extremely light shoe enables sudden direction changes and supports the natural movements in table tennis.

Size: 30 - 36

Art. 98010

# ANTON & THE GRENZAU COMBO

*Anton Stefko is the head coach of our table tennis school. To be trained in a professional way and to have fun at the same time is what Anton guarantees. That's why our participants love him.*

THIS IS WHERE  
THE COMFORTS  
OF A FIRST CLASS  
HOTEL MEET ALL  
THAT MAKES  
TABLE TENNIS  
ENTHUSIASTS HAPPY.
